Audit Findings

Audit Narrative

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The auditing team visited Harmony III Group Home for the onsite portion of audit on April 22, 2019. PREA files for both facilities audited were stored at the Harmony Center, Inc. The files were all labeled according to standard. During the in-brief, the PREA Coordinator, and Home Manager were present the Director of Resident Services was not able to attend due to unforeseen circumstances but was contacted at a later time by phone. The audit process was explained and the administrators were reminded that PREA audits are practice based. During the interview process, the auditing team interviewed 2 out of the 7 staff members and 2 of the 12 residents and ensured the integrity and confidentiality of the interview process was maintained.

Observations were that there were no video monitoring technologies used. Residential monitoring is based solely on the integrity of the staff members present. During the interview process, it was obvious that changes made by Administration were effective and both the residents and staff felt more confident in the implementation of the PREA Process.

The debrief was conducted by phone with the Director of Resident Services. During the debrief, the administrator expressed gratitude for the professionalism and integrity of the audit team.

During the post audit phase and in further review of the requested documentation, determinations were made based on the interview process, the visual observations, documentation review, and/or unsubstantiated evidence of practices.

Facility Characteristics

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

Since the last reported Compliance Audit from the licensing agency dated April 1st, 2019, there have been no known structural changes and no deficiencies notated. Harmony III Group Home is a two-story building which has a capacity of 12 male residents. The age range of offenders is 13-17. During the time of audit, the facility had 12 residents and 7 staff (including a Home Manager and 6 Direct Care). The group home has a kitchen and a dining area, a living room (also shared as a dayroom), the residents recreation is held on the first floor and the resident living quarters are on the second floor.
