In Louisiana, juvenile sentencing practices can vary widely from parish to parish and are subject to change over time. The following report, issued quarterly, is designed to offer an up-to-date view of juvenile custody and supervision populations, both statewide and for all sixty-four parishes. For further background on data definitions, sources, and interpreting the document, please see the accompanying guide

It is our hope that monitoring these reports will help stakeholders at every level follow trends, inform planning, and identify areas in need of further investigation. The following observations are provided as examples to stimulate stakeholders to examine the data themselves with an eye toward local needs and concerns:

- During the first quarter of 2026, there were 502 youth served in a secure custody legal status, 338 non-secure custody, and 56 FINS custody statewide.
- Statewide, about 1.03 youth per thousand had a secure delinquent status; less than .71 youth per thousand had a non-secure delinquent status.
- African American youth are disproportionately represented in every custody and supervision status.
- Custody rates by parish widely diverge, with larger parishes distributed across the spectrum.
